General Medication Coverage Guideline For Medications Which Require Prior Authorization But Do Not Have A Specific Pharmacy Coverage Guideline

Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member's specific benefit plan. This Pharmacy Coverage Guideline must be read in its entirety to determine coverage eligibility, if any.

This Pharmacy Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide BCBSAZ complete medical rationale when requesting any exceptions to these guidelines.

The section identified as "Description" defines or describes a service, procedure, medical device or drug and is in no way intended as a statement of medical necessity and/or coverage.

The section identified as "Criteria" defines criteria to determine whether a service, procedure, medical device or drug is considered medically necessary or experimental or investigational.

State or federal mandates, e.g., FEP program, may dictate that any drug, device or biological product approved by the U.S. Food and Drug Administration (FDA) may not be considered experimental or investigational and thus the drug, device or biological product may be assessed only on the basis of medical necessity.

Pharmacy Coverage Guidelines are subject to change as new information becomes available.

For purposes of this Pharmacy Coverage Guideline, the terms "experimental" and "investigational" are considered to be interchangeable.

BLUE CROSS®, BLUE SHIELD® and the Cross and Shield Symbols® are registered service marks of the Blue Cross and Blue Shield Association, an association of independent Blue Cross and Blue Shield Plans. All other trademarks and service marks contained in this guideline are the property of their respective owners, which are not affiliated with BCBSAZ.

This Pharmacy Coverage Guideline does not apply to FEP or other states' Blues Plans.

Information about medications that require precertification is available at www.azblue.com/pharmacy.

Some large (100+) benefit plan groups may customize certain benefits, including adding or deleting precertification requirements.

All applicable benefit plan provisions apply, e.g., waiting periods, limitations, exclusions, waivers and benefit maximums.

Precertification for medication(s) or product(s) indicated in this guideline requires completion of the [request form](#) in its entirety with the chart notes as documentation. **All requested data must be provided.** Once completed the form must be signed by the prescribing provider and faxed back to BCBSAZ Pharmacy Management at (602)

Criteria:

➤ **Criteria for initial therapy: Medication** is considered *medically necessary* and will be approved when **ALL** of the following criteria are met:

1. Individual does not have a conflicting benefit exclusion
2. Age of individual is consistent with the FDA approved product labeling
3. Indication for use is consistent with the FDA approved product labeling
4. Requested dosage for use is consistent with the FDA approved product labeling
5. Duration of use is consistent with the FDA approved product labeling
6. **ALL** of the required baseline tests cited in the FDA approved product labeling have been completed before initiation of treatment with continued monitoring as clinically appropriate
7. Individual has failure, contraindication, or intolerance to at least 3 covered medications approved by the FDA for the indication or diagnosis if available
8. Product use has established safety and efficacy
9. There are **NO** FDA-label contraindications and other significant exclusions to its use
10. There are no significant interacting drugs

Initial approval duration: 6 months

➤ **Continuation of coverage (renewal request): Medication** is considered *medically necessary* and will be approved when **ALL** of the following criteria are met:

1. The individual has benefited from therapy and remains at high risk and as such requires continued use
2. The condition has not progressed or worsened while on therapy
 - a. Worsening is defined as:
 - i. Disease progression
 - ii. There is no evidence of efficacy, disease stability and/or improvement

iii. Evidence individual has developed significant unacceptable adverse drug reactions that may exclude continued use

3. Individual has been adherent with the medication
4. Individual has not developed any contraindications or other significant exclusions to its continued use
5. There are no significant interacting drugs

Renewal duration: 12 months

- Criteria for a request for non-FDA use or indication, treatment with dosing, frequency, or duration outside the FDA-approved dosing, frequency, and duration, refer to one of the following Pharmacy Coverage Guideline:
1. **Off-Label Use of Non-cancer Medications**
 2. **Off-Label Use of Cancer Medications**

Description:

BCBSAZ benefits require that medications are FDA approved. General medication requests for agents that require prior authorization but do not have a specific pharmacy coverage guideline must include the medication name, dose, frequency, length of therapy anticipated, other agents tried previously with information on failure or ineffective treatments or adverse drug events or contraindications or non-adherence, disease or condition being treated including the severity, and all applicable laboratory and other test results. Additional information submitted by the prescriber will also be reviewed (e.g. clinical articles from the literature, clinical guidelines, etc.).
